WSOE Lives Again!

By John Bunkfeldt

In the last issue of the MACE, there was a fine article about how MSOE pioneered in Milwaukee area broadcasting with WSOE.

Now you have the chance to pioneer in MSOE broadcasting, thanks to the Radio Broadcasting Club. During the past few months, the Radio Broadcasters Club has been making plans for the new WSOE radio.

As a point of clarification, the Radio Broadcasters Club is not affilated with the Ham Club as many people mistakenly believe.

The aims of the Radio Broadcasters Club include starting a current carrier radio station to serve the students in both dorms and to later expand with a educational FM-Stereo station that would serve Milwaukee and the surrounding area. The principle of current carrier radio is to use power lines in each building to carry the radio signal throughout the building. For this reason, the current carrier station would be receiveable only in and close to the dorms.

WSOE will tentatively start broadcasting during the evenings of the Winter Quarter and offer much to the students at MSOE. Those who are part of it will gain both programming and technical skills; those who listen will gain a new awareness of the School's pulse and activities. This is truly a project for the students and by the students since the club members are buying and building WSOE's equipment without outside help as of yet.

Why not come to one of our meetings and find how you can help and be helped by this dynamic new organization? Faculty members also are invited to attend and help in WSOE's activities. The Radio Broadcasters Club meets every even week of the quarter on Thursdays at 7:00 pm in the Harry Bradley theater.
